Notes

All contributions will initially be invested in the Enterprise default investment strategy. This is an AXA lifestyle profile as described in the member booklet (and accompanying AXA literature). Please note that although there is a default investment choice, Enterprise and Buck Consultants are not responsible in any way for your investment decision, which is your responsibility. You should review the accompanying literature carefully and choose investments that are suitable for your personal circumstances. If after receiving your Plan documents you wish to switch your investment choice, you can do so free of charge by contacting AXA or by switching online at the AXA website detailed in the member booklet. If you want to start your Plan by investing all contributions in a different fund, please ask your HR manager for a full application form.
